

Get Specialty Medications for \$0

With our Specialty Drug Savings Program.

To help you save at the pharmacy, Priority Health is providing a specialty drug savings program that helps you take advantage of available manufacturer copay assistance and ensures you receive your medications for \$0, starting January 1, 2023.

How it works

- If you're currently taking a qualifying medication, you'll receive an introductory letter from Priority Health and our partner, SaveOnSP, will follow up with a phone call to you.
- A SaveOnSP representative will explain how the program works, ensure you're enrolled in available manufacturer copay assistance, and answer your questions.
- Then, SaveOnSP will help ensure your enrollment stays valid, that your pharmacy has all the necessary information, and that you receive your prescription for \$0 for the duration of your plan year.

Who's eligible?

If you take a specialty medication that's included on the program drug list, a SaveOnSP representative will reach out directly to you.

That's it, no catches, plus it's **completely free for eligible members**. This program is just one of the ways we're working to help make health care more affordable.

Reach out to your specialty pharmacy if you have questions about your current copay assistance or call Priority Health at the number on the back of your ID card.
